How you can keep your banking more secure

It's important to keep your personal information secure, including your passcodes.

What's a passcode?

Examples of passcodes include your online banking login details like your Macquarie ID and password, usernames, PINs, SMS codes, and Authenticator push notifications and rolling codes.

Top tips

- Never share your passcodes with anyone, including a family member or friend.
- Keep your passcodes secure, try to commit them to memory and don't write them down without disguising them well - particularly on anything that can be lost or stolen alongside a payment card or device.
- Choose a passcode that isn't easy to guess - don't use repeated characters, consecutive numbers, your name, birth date, telephone number, driver licence number etc.
- Change your passcodes regularly.
- Take extra care at an ATM or a payment machine to make sure your passcode can't be seen by those around you.
- Always take care to protect the security and secrecy of your devices and passcodes.
- Download the Macquarie Authenticator app to enhance your banking security and help protect you from fraud.

If you don't take reasonable measures to protect your passcodes and reduce your risk, you may be liable for unauthorised transactions according to Australia's ePayments Code.
